CLAIM AMENDMENTS

1. (Currently Amended) A method of treating treatment procedure for disc herniation or degenerative disc disease in a patient, including the step of:

injecting tissue growth factors or differentiation factors into the <u>central</u> spinal canal or disc as part of the treatment procedure.

- 2. (Currently Amended) The method of claim 1, <u>further</u> including the [[step]] <u>steps</u> of: concentrating and releasing the growth or differentiation factors from a patient's blood <u>withdrawing a volume of blood from the patient; and obtaining the growth or differentiation factors from the volume of blood.</u>
- 3. (Original) The method of claim 1, including the step of: obtaining the growth or differentiation factors from recombinant genetic techniques or animal sources.
- 4. (Currently Amended) The method of claim 1, including the step of selecting wherein the growth factor is BMP-1 and differentiation factors from the following list:

TGF α, β1, 2; EGF, IGF I; PDGF; FGF; IL I, 1a, 1b, 2, 3, 4, 5, 6, ... n; BMP-1, 2, 3, 4, 5, 6, 7, 8, 8B, 9, 12, 13, ... n; VEGF; and recombinant forms thereof.

- 5. (Previously Added; Withdrawn) The method of claim 1, wherein the factor injected into the spinal canal or disc is a transforming growth factor.
- 6. (Previously Added; Withdrawn) The method of claim 1, wherein the factor injected into the spinal canal or disc is an interlukin.
- 7. (Previously Added) The method of claim 1, wherein the factor injected into the spinal canal or disc is a bone morphogenic protein.
